Mohamed Zahangir Ali Molla

AI & Data Science Student | Full Stack Developer

+91 9531879266 | mohamedzahangiralimolla@gmail.com | LinkedIn | Portfolio | GitHub | Port Blair, Andaman & Nicobar Islands, India

PROFESSIONAL SUMMARY

AI & Data Science undergraduate at Anna University with strong experience in building full-stack systems, secure backend architectures, and AI-powered applications. Proven ability to develop scalable APIs, implement OAuth-based authentication, and design real-time data-driven solutions. Demonstrated experience through production-ready projects and national-level hackathons. Actively seeking Software Engineering / Backend / AI Internship roles.

EDUCATION

B.Tech in Artificial Intelligence & Data Science | *Anna University, Chennai*
2024 – 2028

- Current CGPA: 8.3 | Focused on machine learning, system design, and scalable application development.
- Full Stack Developer in training at NxtWave CCBP 4.0 Academy (Industry 4.0 technologies).

Senior Secondary (11th & 12th) – Science | *Govt. Model Senior Secondary School, Sri Vijayapuram, A&N Islands*
2022 – 2024

- CBSE 12th: 92% | JEE Main January Percentile: 94 | JEE Main April Percentile: 92

TECHNICAL SKILLS

Languages: Python | C++ | Java | JavaScript

Frontend: HTML | CSS | Tailwind CSS | Bootstrap | Responsive Design | three.js

Backend & APIs: REST APIs | OAuth 2.0 | OpenID Connect

Databases: SQL | MySQL | PostgreSQL

AI / Data Science: Generative AI | TensorFlow | Data Visualization | Hugging Face | OpenRouter API

Tools & Platforms: Git | GitHub | Figma | VS Code | N8N | Vercel | Cloudflare Pages | Linux | Docker | AWS / Google Cloud | Canva | Make.com

PROJECTS

Jan Suraksha – AI-Powered Fraud Detection Platform

Tech Stack: React.js, Node.js, Express.js, PostgreSQL, Firebase Auth, DeepSeek AI, OpenRouter API

- Built an AI-powered fraud detection system that analyzes phishing links, fraudulent UPI IDs, and malicious QR codes in real time.
- Implemented AI/ML models for scam pattern detection and integrated PostgreSQL with hash-first storage for privacy-compliant threat logging.
- Secured authentication using Firebase Auth and OAuth; deployed a live prototype accessible at jansuraksha.pages.dev
- GitHub: github.com/Mohamedzahangir/jansuraksha

LinkedIn Auto Post Agent – Backend Automation Agent

Tech Stack: Node.js, Express.js, LinkedIn API, OAuth 2.0, OpenID Connect

- Developed a backend automation system to publish posts via LinkedIn API using OAuth 2.0 authorization
- Implemented complete 3-legged OAuth flow including token exchange and scoped access control
- Designed modular backend capable of handling multiple authenticated sessions securely
- Ensured secure credential management using environment-based configurations
- Designed modular backend architecture with environment-based credential security (.env).
- GitHub: https://github.com/Mohamedzahangir/linkedin-ai-agent

Personal Developer Portfolio Website

Tech Stack: HTML, CSS, JavaScript, three.js 3D objects, Responsive Design, Vercel

- Built a fully custom interactive portfolio three.js 3D elements, expandable project cards, and scroll-triggered animations.
- Implemented responsive layout with modular section-based architecture optimized for all devices.
- Live at zahangir-portfolio-snowy.vercel.app | GitHub: github.com/Mohamedzahangir/zahangirPortfolio

ACHIEVEMENTS & CERTIFICATIONS

- 2x National Waiting List Qualifier – Smart India Hackathon (SIH): Competed on real-world government problem statements under national-level evaluation.
- Microsoft Certification: Introduction to Git
- Microsoft Certification: Introduction to Generative AI and Agents
- NxtWave CCBP 4.0: Build Your Own Static Website | Build Your Own Responsive Website

SOFT SKILLS

: Problem-Solving | Analytical Mindset | Attention to Detail | Logical Thinking | Time Management | Communication | Adaptability | Creativity | Collaboration | Continuous Learning | Leadership

LANGUAGES

: English | Hindi | Bengali
